

British Columbia's Low-Carbon Material Sourcing Guide

Embodied Carbon Emissions by Material Category New Part 9 Homes

The Low Carbon Material Sourcing Guide (LCMSG) was developed to support designers and contractors in achieving their carbon reduction goals by providing **a list of low-carbon building materials that are readily available within BC** with direct links to suppliers of these materials.

The LCMSG offers guidance on the following material types:

Insulation

Reinforcing Bar (Rebar)

Cladding

Ready Mix Concrete

Novel Materials

Minimize Materials

Choose Low-Carbon Alternatives

Build Smarter Structures

If you are a designer or builder, now's the time to add the LCMSG to your tool box!

If you are a supplier or manufacturer, reach out to CLF BC to learn how to add your product to the sourcing guide.

Check out the guide today!
